Vaginal Dryness and Painful Intercourse

As a Gynecologist, I have utilized numerous creams, hormones, surgeries, and devices to promote vaginal health for patients who complain of dryness, painful intercourse, recurrent infections and loss from aging, having babies, or health changes. I am so excited to be able to offer a non-invasive 5 minute energy procedure that improves the quality of life for so many patients.

Women can renew intimacy with MonaLisa Touch CO2 laser. MonaLisa Touch (MLT) is the gold standard in energy based devices to restore vaginal health. This treatment is the only technology with over 30 published, peer reviewed studies. Thousands of patients worldwide have reported excellent and safe outcomes. Over 90% of patients report benefit from treatment with most women stating that it is “life changing.” See multiple Utube patient testimonials regarding MLT. A patient I treated who had multiple other treatments for her vaginal and vulvar skin problems reported, “Amazing, after all these years I can sit comfortably... and I no longer crack or bleed.” My postmenopausal patients report, “...I feel rejuvenated!”
